

Adam Willard
MIT, Department of Chemistry

Syllabus

Day 1, 8/17/26: Core concepts in statistical mechanics

Day 2, 8/18/26: Dynamics, reversibility, and the Jarzynski equality

Day 3, 8/19/26: Rare but important events and transition state theory

Day 4, 8/20/26: Transition path sampling, committors, and reaction coordinates

Day 5, 8/21/26: Marcus theory
